I am just a little citizen in HK. I just received a message that we cant buy milk powder product through their milk powder product companies via phone or internet and also we cant receive any informations from them in the future.

First of all, I agree that breast feeding is very important and a good gift for new coming baby. However, not all mothers can produce enough breast milk due to many reasons such as stress, not enough sleep, etc. Then we should get used to buy milk powder products. Dear Government, do you know it's very difficult to buy milk powder product from all supermarket stores and pharmacies? We are so busy to take care of our babies, our career and our families. So many "non-HK citizens" also come to HK to buy those products. At this moment, at least I can call companies to buy milk products via phone then I can buy them. If Government need to stop those product companies activities, so we cant buy those products for our babies. What our babies can eat then? I hope Government still consider this question carefully!

Promote breast feeding is important but against the activities from companies is not a good resolution on this topic!
