Dear Sir/Madam,

I m writing to express my comments regarding the ridiculous HK Code you are going to launch. What's the point of prohibiting them to setup Mammy Club and delivery sample? How i can get information and samples of different brand if they can't offer free sample? What's more, we are saving every penny. The free gifts i can get from them helping me out to save my expenditure.

Besides, tell me if you government will provide assistance and facilities on breast-feeding along with the code launched. Do you think you can set rules such as longer maternity leave, compulsory breastfeeding time during office hour, every malls have to set up feeding rooms etc?

You are eliminating the HK competitiveness. We used to a free trade city. Now, we are ruled by the useless housing tax thing and this ridiculous HK code. Pls. re-consider!!

I would like to keep my comments anonymous.
